

TECHNICAL SKILLS

- **Languages** – Java | C++ | JavaScript | TypeScript
- **Technologies** – NextJs | React.js | Express.js | Node.js | Redux | MongoDB | PostgreSQL | MySQL | HTML | CSS | Tailwind CSS | Zustand | ZOD
- **Concepts** – Full Stack Development | Data Structures & Algorithms | Operating System | Computer Networks | Database Management Systems | Design and Analysis of Algorithms
- **Development Tools** – GIT | GitHub | VS Code | NeoVim

WORK EXPERIENCE

Full Stack Intern | FullToss | (Dec 24 – Jan 25)

[Live](#) | [GitHub](#)

- **Tech Stack** – React.js, Next.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS
- **Engineered a high-traffic lottery platform** capable of processing **10,000+ ticket purchases per month**, ensuring seamless scalability with a modular backend.
- **Designed and integrated a secure wallet system** supporting real-time transactions, reducing payment processing errors by **35%**.
- **Developed an automated draw mechanism** with both custom and random ticket selection, improving system efficiency by **50%**.
- **Built a real-time affiliate tracking system** for **100+ retailers**, enhancing commission accuracy and revenue reporting.

WORK EXPERIENCE

Study Notion – Online Ed-Tech Platform

[Live](#) | [GitHub](#)

- Tech Stack – React, MongoDB, Node.js, Express.js, Redux Toolkit, Zod, Razorpay API
- **Developed a full-stack e-learning platform** with support for **1,000+ students & instructors**, enabling seamless course creation and enrollment.
- Built a **RESTful backend** with **35+ API endpoints** in Node.js & Express.js, handling authentication, course management, and payments.
- **Implemented JWT-based authentication**, securing user data and reducing unauthorized access attempts by **95%**.
- **Integrated Razorpay API**, enabling secure payment processing and reducing **transaction failures by 30%** through automated error handling.
- Designed a modular frontend architecture, reducing component reusability efforts by 50% and improving development speed.

Chit Chat – Real-Time Chat

[Live](#) | [GitHub](#)

- Tech Stack – React, Node.js, Express.js, MongoDB, DaisyUI, Zustand, Socket.io
- **Developed a real-time chat application** supporting **100+ concurrent users**, ensuring smooth and instant messaging.
- Built backend APIs with Node.js & Express.js, **managing 1,000+ messages** daily with efficient storage in MongoDB.
- **Implemented real-time message** updates using **Socket.io**, reducing message delay to under 100ms.
- Used **Zustand** for frontend **state management**, improving data fetching efficiency by 40% and reducing unnecessary re-renders.

Portfolio Website

[Live](#) | [GitHub](#)

- **Designed and developed a portfolio website** to showcase **5+ projects, skills, and experience** using **React & Tailwind CSS**.
- **Implemented dynamic content rendering**, allowing easy updates without modifying code, reducing maintenance time by **60%**.
- **Ensured mobile responsiveness**, making the website **100% adaptive** across different devices and screen sizes.
- **Integrated smooth animations and transitions**, enhancing user engagement and navigation experience.

FUNCTIONAL AREAS

- | | | |
|------------------------|-------------------------|----------------------------|
| • Software Development | • Problem Solving | • Collaboration & Teamwork |
| • Database Management | • Software Architecture | • Software Documentation |

EDUCATION

- **B.E. Computer Science & Engineering** July 2020 – June 2024
Chandigarh University – 7.74
